Product description

The digital maps used in the original BMW navigation systems are updated twice a year. The CDs and DVDs are an important retrofit product given the constantly-changing transport network. Changing aspects include, for instance, new buildings, growing industrial areas and bypasses.

Sales features/benefits

- Eastern Europe add-on for High and Professional products.
- Extensive revision and further addition to the traffic jam warning RDS-TMC function (Traffic Message Channel).
- Regular updates of the BMW partner directory.
- Update of the POI database (points of interest) with 32 categories and now well over a million destinations (e.g. attractions, hotels, restaurants, airports, petrol stations, shopping malls, etc.). The POI database has been augmented with a further 50,000 destinations.
- Falk travel guide with DVD HIGH and DVD Professional.

Note

Regular updates are important, since up to 15 % of the digitised roads change with each update! ◀

Availability

BMW digital road maps CD

Version 2009-2

Product description

The CDs contain the fully-digitised road network of most countries, with other countries having a significant increase in the number of road kilometres and additional information added to the CD. To facilitate convenient navigation, including across international borders, the routes to numerous cities of neighbouring countries have been documented via the European major roads network.

Depending on the country version, a traffic jam warning function (RDS-TMC function) has been integrated that warns you about traffic jams and obstacles in the road and offers you alternative routes.

Sales features/benefits

The following countries are available on CD:

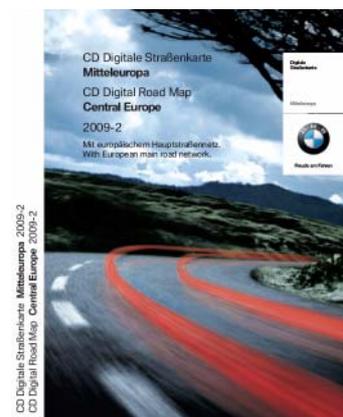

- Germany
- Benelux countries
- Scandinavia
- GB/Ireland
- France
- Spain/Portugal
- Italy
- Central Europe (southern Germany: Bavaria and Baden-Württemberg, Switzerland, Austria, Liechtenstein, northern Italy and large parts of the Czech Republic)

Further information

- Traffic jam warning system (**TMC function**) is available in the following countries: Germany, Switzerland, Austria, Italy, France, Great Britain, Netherlands, Belgium, Denmark, Spain, Norway, Sweden and the Czech Republic.
- **Free TMC service** is not available in all countries. To receive the encrypted TMC service, we can offer you a BMW ConnectedDrive contract for specific countries.
- Directory of BMW partners.
- Expanded POI database.

Technical information

The digital road map on CD-ROM can be used in the following cars: E38, E39, E46, E52, E53, E65, E66, E83, E85 and E86.

Note

As in past updates, these new CDs feature a massive increase in roads covered and additional information. ◀

BMW Digital Road Map CD, Set of 8 CDs Version 2009-2

Product description

The 8 CD set gives the customer all western European countries including large parts of the Czech Republic, in a special case.

Sales features/benefits

- Significant money saving compared to buying the CDs separately.
- High quality case made from synthetic leather.
- Ideal for planning trips and holidays.
- Easy to order, since no specific details about the car are needed.
- Can also be stocked for direct sales.

Supplied package

8 CDs including booklet and case:

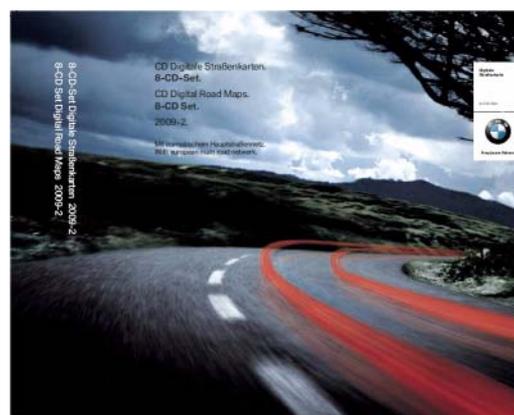

- Germany
- Benelux countries
- Scandinavia
- GB/Ireland
- France
- Spain/Portugal
- Italy
- Central Europe (southern Germany: Bavaria and Baden-Württemberg, Switzerland, Austria, Liechtenstein, northern Italy and large parts of the Czech Republic)

Further information

- Traffic jam warning system (TMC function) is available in the following countries: Germany, Switzerland, Austria, Italy, France, Great Britain, Netherlands, Belgium, Denmark, Spain, Norway, Sweden and the Czech Republic.
- Free TMC service is not available in all countries. To receive the encrypted TMC service, we can offer you a BMW ConnectedDrive contract for specific countries.
- Directory of BMW partners.
- Expanded POI database.

Technical information

The 8 CD set can be used in the following cars: E38, E39, E46, E52, E53, E65, E66, E83, E85 and E86.

Note

The GB/Ireland CD map cannot be used in E65 and E66 cars. The sets of 8 CDs cannot be returned! ◀

BMW DVD Road Map Europe High Version 2009-2

Product description

More roads have been added to the digital road network on the DVD.

The Road Map Europe HIGH contains the latest road maps for:

Andorra, Belgium, Denmark, Germany, Finland, France, Greece, Gibraltar, United Kingdom, Ireland, Italy, Liechtenstein, Luxembourg, Monaco, Netherlands, Norway, Austria, Portugal, San Marino, Slovakia, Spain, Sweden, Switzerland, Czech Republic, Vatican City. **New! Includes eastern Europe:** Parts of Croatia, Poland, Russia, Slovenia and Hungary, as well as the major road network of other eastern European countries (latest data).

Sales features/benefits

The nuisance of having to change CDs when crossing a border is a thing of the past. Depending on the system software, the following output languages are supported and you can switch between them: German, English, French, Italian, Dutch and Spanish.

Further information

- Traffic jam warning system (**TMC function**) is available in the following countries: Germany, Austria, Switzerland, France, Great Britain, Italy, Netherlands, Belgium, Denmark, Spain, Norway, Sweden and the Czech Republic.
- **Free TMC service** is not available in all countries. To receive the encrypted TMC service, we can offer you a BMW ConnectedDrive contract for specific countries.
- Directory of BMW partners.
- Another 50,000 points of interest added to the POI database in 32 categories.
- Updates the European road network.
- Falk travel guide for the whole of Western Europe (excluding Scandinavia).

Technical information

The DVD can be used in the following cars: E39, E46, E52, E53, E65, E66, E83, E85 and E86.

Note

- A DVD navigation computer (SA 609) built after 09/02 is required!
- Of course, navigation CD-ROMs can still be used! ◀

Standard use of the DVD navigation computer

| | |
|----------|---------|
| E39, E46 | 09/2002 |

** Please note the following product information in ASAP SAZ_013_08_07 and SAZ_014_10_07

BMW DVD Road Map Europe Business Version 2009-2 (not including eastern Europe)

Product description

This DVD is exclusively for use with the BMW Business navigation system (**SA 606**). The countries covered are the same as for the DVD Road Map Europe HIGH, but **without eastern Europe**.

Sales features/benefits

Easy, precise navigation through all the countries of Western Europe. The navigation system therefore enables drivers to navigate through different countries (including over waterways) without having to change the DVD. It is possible to avoid traffic jams and obstructions in many countries using the RDS-TMC code. The TMC function is supported in the following countries:

Germany, Austria, Switzerland, France, Great Britain, Italy, Netherlands, Belgium, Denmark, Norway, Sweden, Spain and the Czech Republic.

Further information

- **Free TMC service** is not available in all countries. To receive the encrypted TMC service, we can offer you a BMW ConnectedDrive contract for specific countries.
- **2D map display** as well as arrow display (only new vehicles built after 03/2007).
- Directory of BMW partners.
- Another 50,000 points of interest added to the POI database in 32 categories.

Note

This map DVD will only function correctly with system software issued after March 2005.

If the illustrated “Speaker”, “Traffic messages” (depending on country) and “Start/End navigation” symbols are shown in the navigation view, the system software does not require updating.

If the system does not meet these conditions, the car can be updated free of charge (procedure under current warranty terms and conditions, see PUMA action No. 4952119). **Important: this action expired at the end of 2008!** ◀

Technical information

The DVD can be used in the following cars: E60, E61, E63, E64, E81, E82, E87, E88, E90, E91, E92, E93.

SA 606 Business navigation system is required. Dynamic navigation must be set using the menus in the Business navigation system.

BMW DVD Road Map Europe Professional Version 2009-2 (including eastern Europe)

Product description

This DVD is exclusively for use with the BMW Professional navigation system (**SA 609**). The countries covered are the same as for the DVD Road Map Europe HIGH **including eastern Europe**. Dynamic navigation must be set using the menus in the Professional navigation system.

Sales features/benefits

The Falk travel guide, as well as the option of navigating by entering districts, offers additional advantages.

The navigation system enables drivers to navigate through different countries (including over waterways) without having to change the DVD. It is possible to avoid traffic jams and hindrances in many countries using the RDS-TMC code.

The **TMC function** is supported in the following countries:

Germany, Austria, Switzerland, France, Great Britain, Italy, Netherlands, Belgium, Denmark, Norway, Sweden, Spain and the Czech Republic.

Further information

- **Free TMC service** is not available in all countries. To receive the encrypted TMC service, we can offer you a BMW ConnectedDrive contract for specific countries.
- Directory of BMW partners.
- Another 50,000 points of interest added to the POI database in 32 categories.
- Falk travel guide for the whole of Western Europe (excluding Scandinavia).

Technical information

The DVD can be used in the following cars:
E60, E61, E63, E64, E70, E71, E81, E82, E87, E88, E90, E91, E92, E93.

Note

A DVD navigation computer (SA 609) is required! ◀
